## Chapter 1

## **Linear Regression**

#### 1.1 Matrix Derivatives

#### 1.1.1 trace fact

1. trAB = trBA

#### proof:

Let A be a m-by-n matrix, let B be a n-by-m matrix.

$$trAB = \sum_{i=1}^{m} (AB)_{ii} = \sum_{i=1}^{m} (\sum_{j=1}^{n} A_{ij}B_{ji})$$
(1.1)

$$trBA = \sum_{i=1}^{n} (BA)_{ii} = \sum_{i=1}^{n} (\sum_{j=1}^{m} B_{ij} A_{ji})$$
(1.2)

$$trBA = \sum_{i=1}^{n} (\sum_{j=1}^{m} B_{ij} A_{ji})$$

$$= \sum_{j=1}^{m} (\sum_{i=1}^{n} B_{ij} A_{ji})$$

$$= \sum_{j=1}^{m} (\sum_{i=1}^{n} A_{ji} B_{ij})$$

$$= \sum_{i=1}^{m} (\sum_{j=1}^{n} A_{ij} B_{ji})$$

$$= trAB$$

$$(1.3)$$

**2.**  $\nabla_A tr AB = B^T$ 

#### proof:

Let A be a m-by-n matrix, let B be a n-by-m matrix.

#### 1.1. MATRIX DERIVATIVES

9

$$\nabla_{A} tr A B = \begin{bmatrix} \frac{tr A B}{\partial A_{11}} \dots \frac{tr A B}{\partial A_{1n}} \\ \dots \\ \dots \\ \frac{tr A B}{\partial A_{m1}} \dots \frac{tr A B}{\partial A_{mn}} \end{bmatrix}$$

$$= \begin{bmatrix} B_{11} \dots B_{n1} \\ \dots \\ \dots \\ B_{1m} \dots B_{nm} \end{bmatrix}$$

$$= B^{T}$$

$$(1.4)$$

3. 
$$\nabla_{A^T} f(A) = (\nabla_A f(A))^T$$

#### proof:

Let A be a m-by-n matrix.

$$\nabla_{A^{T}} f(A) = \begin{bmatrix} \frac{\partial f(A)}{\partial A_{11}} \cdots \frac{\partial f(A)}{\partial A_{m1}} \\ \cdots \\ \cdots \\ \frac{\partial f(A)}{\partial A_{1n}} \cdots \frac{\partial f(A)}{\partial A_{mn}} \end{bmatrix}$$
(1.5)

$$(\nabla_{A}f(A))^{T} = \begin{bmatrix} \frac{\partial f(A)}{\partial A_{11}} \dots \frac{\partial f(A)}{\partial A_{1n}} \\ \dots \\ \frac{\partial f(A)}{\partial A_{m1}} \dots \frac{\partial f(A)}{\partial A_{mn}} \end{bmatrix}^{T}$$

$$= \begin{bmatrix} \frac{\partial f(A)}{\partial A_{11}} \dots \frac{\partial f(A)}{\partial A_{mn}} \\ \dots \\ \dots \\ \dots \\ \frac{\partial f(A)}{\partial A_{1n}} \dots \frac{\partial f(A)}{\partial A_{mn}} \end{bmatrix}$$

$$= \nabla_{AT}f(A)$$

$$(1.6)$$
